- ▶ Introduction to the course
- ▶ Introduction to TKT CLIL
- ▶ Format/structure of the TKT CLIL exam and requirements; how to prepare

Defining CLIL

CONTENT AND LANGUAGE INTEGRATED LEARNING

"CLIL refers to situations where subjects, or parts of subjects, are taught through a foreign language with dual-focused aims, namely the learning of content and the simultaneous learning of a foreign language."

What are the origins of CLIL?

Bilingual teaching has been practised for many years, from the Babylonian era to the early sixties, when it was introduced in many schools around the world.

The term **CLIL** was coined in 1994 by David Marsh as a methodology similar to but distinct from language immersion and content-based instruction.

Introduction to CLIL

- ▶ Key concepts of CLIL methodology and other ELT methodologies;
- ▶ Introduction to the 4Cs of CLIL:
 - Content
 - Cognition
 - Communication
 - Culture/community/citizenship

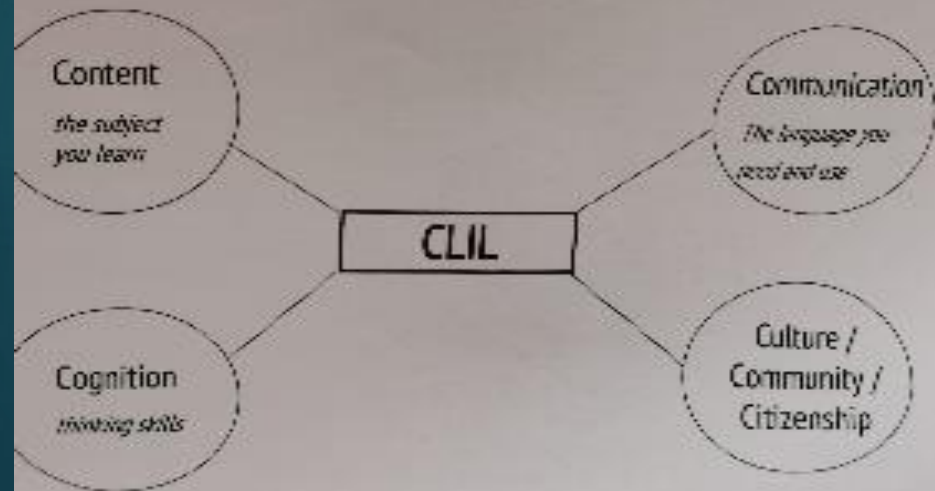

Culture/Community/Citizenship

Exposure to alternative perspectives and otherness and self.

Day 3 - TKT CLIL

Lesson Planning and Scaffolding

- ▶ CLIL Lesson planning
- How to plan a CLIL lesson
- Essential elements of lesson planning
- How a CLIL lesson differs from a GE lesson

- ### Lesson Planning Checklist
- Complete the gaps in the checklist with the areas of planning:
- | PERSONAL AIMS
ANTICIPATED PROBLEMS | TIMINGS | CLASSROOM DESCRIPTION
CONTENT | ACTIVITIES
OUTCOMES | ASSESSMENT
SOURCES |
|--|---------|----------------------------------|------------------------|---|
| Questions <ul style="list-style-type: none"> Who are my students? What do they know? What do they need? How can I plan a lesson which is appropriate for the different individuals in the class? What should the whole lesson look/feel like? What is the best way to start the lesson? What is the most effective way of ending the lesson? What topics/themes do I want to take into the classroom? What topics/themes would be most appropriate for my students (based on their age, level, cultural background etc)? How does the lesson I am going to teach fit in with the overall syllabus? What have we been doing in recent lessons – and how can that help me to decide what to do next? What links can I make between the various topics and themes in past and future lessons and the topics and themes I am thinking of using in this one? When the lesson (or stage of the lesson) is finished, what will my students have achieved if everything goes according to plan? How will I know if the students have achieved the aims that I set for them? What activities would be most appropriate for my students? What materials, classroom technology, etc. (if any) do I need for the activities I am thinking of? Exactly how can I make the activities work best? What procedure will I use? What is the best sequence for the activities I want to use? Who is going to be talking to/working with whom in the activities I have chosen? Which is the best type of student grouping (pairwork, groupwork, individual, etc.) for the activity? How long do I expect the activity to last? Based on my experience (and who my students are) what are they likely to find most difficult/complicated in the lesson I am planning? How can I avoid the kinds of difficulties/problems that I am predicting? What will I do if these problems arise? What extra activities/ideas can I take into the lesson in case we run out of things to do? What extra ideas/activities can I take into the lesson in case what I have planned fails to engage the students? What alternative ways of using my plan can I think of? What will I achieve with the lesson I am planning? What new things might I try out/experiment with in the lesson I am planning? | | | | Planning area

 - ▶ both content and language

Assessment in CLIL Lessons

GIVING CONSTRUCTIVE FEEDBACK

- **Evaluative feedback**, in the form of grades or brief general comments, (e.g. "well done"), provides some information about learning, but does not convey the information and guidance that students can use to improve.
- **Descriptive feedback** provides students with detailed, specific information about improving their learning.
